INVITATION

On behalf of the Organizing Committee, it is indeed a great honor and pleasure to invite you to the International Conference on Electrospinning 2012 (**Electrospin 2012**), which will be held on May 29th to June 1st, 2012 in Jeju, Korea.

The **Electrospin 2012** is intended to provide an open forum to all participants with an opportunity to present the latest important findings in electrospinning research activities and to discuss and share them with experts.

Very interesting lectures and presentations by distinguished speakers from all over the world are planned for the **Electrospin 2012**. In addition to the professional exchange of ideas, it will be a place to meet friends who share common research objectives related with electrospinning works and to have chances for further co-work that may result in mutual achievements.

Jeju, the venue of the **Electrospin 2012** is a beautiful volcanic resort island. Each year, more than 6.5 million people visit Jeju to enjoy exotic natural beauties, local culture and various leisure activities. As the Chairman of the **Electrospin 2012**, I have no doubt that this conference will prove itself to be a memorable experience for participants.

We look forward to seeing you in Jeju on May 29, 2012.

Sincerely,
Prof. Il-Doo Kim
Chairman of Organizing Committee
